

INTRODUCTION

Henry Flack started manufacturing French polishes and blending waxes in 1860 to supply the cabinet makers and woodcarvers in East London. After severe bomb damage during the Second World War, the company relocated to Beckenham in Kent. In 1961 the company was acquired by the Bollom family, and Briwax International is still a Bollom family business today. The Briwax Product range has been carefully selected from the finest traditional trade finishes, drawing on 150 years of experience supplying furniture manufacturers. Many of the Briwax polishes and products are basically the same as the original formulas developed to meet the quality demands of the professional finisher.

BRIWAX WAX POLISH

Wax polish offers the simplest of finishes to unfinished / raw timber or the final touch to a full French polished surface. All our wax polishes are blends of natural Beeswax and Carnauba wax tailored to perform in different finishing situations.

BRIWAX AND BRIWAX ORIGINAL

Both waxes are formulated to produce the Briwax finish on finished and unfinished timber. The Briwax has been blended with slightly milder solvents, so that it gives off less odour whilst drying, whilst at the same time providing a smooth wax application and finish. The film remains as a paste for slightly longer to aid the even application. Briwax Original is formulated with fast drying, stronger solvents which speed up drying, and also increase the cleaning ability of the wax slightly. This means that it will renovate older dirtier furniture without the need for furniture reviver / restorer. The choice is yours, either product will leave you with the deep grain enriching BRIWAX shine.

COLOUR RANGE

available in CLEAR
and these
13 wood colours

Antique Pine Teak Old Pine

Honey Dark Oak Jacobean Rustic Pine Tudor Oak

Walnut Medium Brown Antique Mahogany Antique Brown Spanish Mahogany

These colours are simulations only. The final colour of your project will also depend on the colour of the timber that you start with. Always try an inconspicuous area to check you are satisfied with the colour achieved before commencing to wax the whole piece.

BRIWAX

This is the natural woodfinishing treatment for all types of wood, in the home and in the workshop. A blend of Beeswax and Carnauba waxes to give an instant natural sheen to bare wood or wood prepared with Sanding Sealer. Ideal for wood-carvings and turned wood, for floors and skirtings. Briwax cleans and protects wood, tiles, metalwork, marble and melamine etc. Available in Clear, which maintains the natural colour of the wood, and 13 wood shades to stain and wax in one operation. Briwax is extensively used in the furniture industry. Available in Briwax Original or Briwax variations. Easily applied with 0000 Steel Wool, Briwax brushes or cloth.

Colour range: Clear, Antique Pine, Teak, Old Pine, Honey, Dark Oak, Jacobean, Rustic Pine, Tudor Oak, Walnut, Medium Brown, Antique Mahogany, Antique Brown and Spanish Mahogany.

Sizes: 400g / 370g, 5 litre and 20 litre (limited colours).

NATURAL CREAMED BEESWAX

Manufactured to a traditional formulation using only the finest refined natural Beeswax, linseed oils and genuine turpentine. Natural Creamed Beeswax is the traditional natural way to clean and revive the natural colour of wood and enrich the patina of all good furniture. Briwax Creamed Beeswax is a mild cleaner and will help build the patina on your fine furniture. *Colour range:* Natural (Clear)

Size: 250ml

LIMING WAX

A smooth white tinted paste wax, formulated to produce a white grained finish in open grained timbers. Particularly effective on oak and similar timbers. It is most effective when applied directly onto the bare wood giving the deep white colouring, but for an even effect it can be applied onto stained and sealed surfaces. Some woods will benefit from opening the grain with a wire brush. Liming Wax can be overcoated with Clear Briwax for a more durable finish.

Size: 220gm

BRIWAX FLOOR WAX

Briwax floor wax is a blend of selected waxes to give an easy to apply, whilst hard-wearing, finish, which buffs to give a natural satin sheen wax finish to old or new wooden floors. *Colour range:* Clear

Size: 2.5 litre

BRIWAX SPRAY WAX

The grain enhancing beauty of a Briwax finish, in an easy to use, convenient aerosol pack. Can be used in exactly the same way as Briwax or as a regular maintenance product for most types of furniture. Contains no silicones.

Size: 400ml

FURNITURE REVIVER / RESTORER

A special blend of solvents, formulated to clean, restore and revive most high quality furniture finishes. Will clean off any dust and grime, will remove the sticky remains of the household spray 'polishes' and give an excellent base for finishing with Briwax or Briwax Creamed Beeswax Polish.

Size: 250ml

WAX REMOVING SOLUTION

A special blend of mild and strong solvents formulated to remove wax finishes from a wide variety of timber. Designed to be used primarily on raw or sealed wax timber. More traditional furniture finishes should have any wax removed by using our furniture Reviver / Restorer.

Size: 500ml

SHELLAC SANDING SEALER

A traditional style sealer. Formulated using the natural, harvested shellac. It forms an ideal base for any of our wax polishes, or for the other shellac based polishes, such as French Polish or Button Polish. Shellac Sanding Sealer uses alcohol to dissolve the shellac, and as a result dries very quickly. When combined with our Briwax or Briwax Original it enables a grain enhancing complete finish to be applied to shelves, architraves, banisters, skirting, softwood dado rails or a piece of unfinished timber furniture in just one afternoon.

Sizes: 500ml & 5 litre

SOFTWAX FILLER STICKS

Softwax Filler Sticks are a blend of waxes, pigments and stains which are designed for the quick and easy repair of scratches, cracks and small holes on wooden and plastic surfaces. A spatula is included for easy application.

Colour range: Antique Mahogany, Antique Pine, English Mid Oak, English Light Oak, Walnut, Golden Yew, Jacobean, Light Mahogany, Rustic Brown and Natural.

TOUCH-UP PENS

Easy to use pens with a soft felt tip combined with a unique pump action valve system, perfect for disguising blemishes and scratches on finished wood surfaces. The dyes and pigments are water-based.

Colour range: Mahogany, Oak, Pine, Cherrywood, Light Oak, Teak, Walnut and White.

DANISH OIL

Briwax Danish Oil is a blend of oils and resins which seal, feed and finish all varieties of wood. The penetrating finish dries to a satin finish within a couple of days without leaving a surface film to chip or scratch. Danish Oil can be overcoated with Briwax for a soft sheen.

Sizes: 250ml, 500ml, 1 litre & 5 litre

TEAK OIL

Briwax Teak Oil is a blend of oils and resins which seal, feed and finish all varieties of wood. The penetrating finish dries to a gloss finish within a couple of days without leaving a surface film to chip or scratch. Teak Oil is often used on garden furniture, or similar items. It is slightly more resistant to exterior conditions than Danish Oil.

Sizes: 250ml, 1 litre & 5 litre

STEEL WOOL

Briwax Steel Wool is manufactured to a very high specification in an 'oil free' process to ensure a consistent degree of abrasion which does not mark or stain the wood or finish.

It is available in three grades:

Grade 0000:

This very fine grade steel wool is particularly recommended for applying wax polish, cleaning and polishing metals.

Grade 0:

This grade is used for stubborn dirt on woodwork and metal or for use after stripping paint to ensure a clean surface prior to finishing.

Grade 2:

This coarse steel wool is used mainly for stripping paint, lacquers and varnish from woodwork as an aid to paint strippers.

BRIWAX CYLINDRICAL DRILL BRUSH

A drill attachment of natural grass bristle to take the effort out of buffing-up wax finishes on large areas of woodwork and carved areas.
